

Infrared & Digital Solutions for Judicial Markets

Williams Sound is a global designer and manufacturer of wireless listening technologies, meeting the communication needs of the judicial market for more than 35 years. Our wireless technology includes both installed and complete packaged systems for use in hearing assistance and/or simultaneous interpretation. Our infrared systems provide secure transmission, ensuring your peace of mind in the most critical communication applications. Many Williams Sound systems meet the new 2010 Americans with Disabilities Act (ADA) accessibility guidelines and are covered by an industry leading, five-year warranty.

Applications:

- Hearing assistance
- Language interpretation (up to 14 channels simultaneously)
- Jury deliberation rooms
- Language access
- Judges chambers

Complete Packaged Infrared and Digital Systems

The sleek and stylish WIR TX75 is designed to maximize coverage area up to 4,000 square feet (transmitter with slave) in single-channel mode. A single CAT-5 cable carries both power and signal to slaves—truly a one-cable connection. Mounting bracket and international power supply are included.

System Includes:

- (1) WIR TX75 infrared transmitter
- (1) WIR TX75-S slave transmitter
- (5) WIR RX18 under-the-chin, two-channel receivers
- (1) CHG 518 drop-in charger

WIR SYS 91V

Featuring NEW SoundPlus® Two-channel Infrared System

This complete, turnkey infrared solution combines value and functionality. The all-in-one WIR TX90 transmitter eliminates the need for rack space, while providing up to 28,000 square feet of coverage for your most demanding installs. (Receiver options determine coverage.) Courtroom participants will appreciate the comfort of the NEW WIR RX15-2 headset receiver, and you'll enjoy this high-quality system backed by our industry-leading, five-year warranty. This system meets the new 2010 Americans with Disabilities Act (ADA) accessibility guidelines.

WIR SYS 3

This professional, turnkey infrared solution features a rack-mountable modulator and emitter that offers unsurpassed coverage – up to 28,000 square feet. (Receiver options determine coverage.) Featuring the popular WIR RX18 under-the-chin, rechargeable receiver, this system offers ease of use and maintenance. Simply place the receiver in the charging bay over night – ready for use during the next day's proceedings. This system meets the new 2010 Americans with Disabilities Act (ADA) accessibility guidelines.

Infrared Receiver Selections

WIR RX15-2

NEW headset-style, two-channel receiver provides comfort and style.

WIR RX18

Popular under-the-chin, two-channel, stereo receiver. Easy maintenance. Use with the CHG 518 5-bay charger.

WIR RX22-4

High sensitivity receiver for courts that need up to four channels of audio transmission. Ideal for multiple-language, hearing assistance or audio description applications.

Digi•Wave™ Language Interpretation System (DWS INT 2)

This completely portable, wireless system is designed for language interpretation use in the 2.4 GHz band. Ideal for small-to medium-size courtrooms, presentation-style conferences and meetings. Designed to provide all functions necessary for simultaneous interpretation of up to 14 languages where a floor, or common, language is used. Unlimited number of listeners (using a DLR-50) can select their language, listen to the interpreter of their choice or to the floor speaker. Additional DLT-100s can be used to accommodate additional interpreters.

**Other pre-packaged systems are available. Or contact us to custom*

package a system that meets all of your courtroom needs. Emitters are also available in white.
