

TVTALKER™ TV LISTENING SYSTEM
(WIR 238)

Create the opportunity for a shared, yet quiet, environment for residents watching TV, chatting or reading. Connect the TV Talker directly to a TV, DVD player or stereo. Use the lightweight, under-the-chin style receiver to listen to the TV or stereo without disturbing others.

*“The resident has a right to a dignified existence,
**self-determination
& communication**
with and access to persons and services inside
and outside the facility.”*

— **Index 483.10 / Resident Rights**

MDS 3.0 AND ADA COMPLIANCE

Williams Sound is a global designer/manufacturer of wireless listening technology, serving personal and professional listening needs worldwide for more than 35 years. At Williams Sound, we understand the impact and importance of hearing in people's everyday lives. That is why we have set our sights on being a legendary supplier, providing knowledgeable, dedicated service. Williams Sound products include the Pocketalker® Personal Amplifier, Motiva® Personal FM, TV Talker™ TV Infrared and FM Listening Systems, and PhoneMax Amplified Telephone – all meeting MDS 3.0 and ADA compliance needs.

COMMUNICATION AIDS

ARE YOU IN COMPLIANCE?

Residents have a right to quality of care -- including the right to have their communication needs met. The MDS 3.0 Basic Communication Kit from Williams Sound will help you provide reasonable accommodation -- and enhance the quality of life for your residents by decreasing isolation, encouraging interaction and, ultimately, strengthening relationships throughout your facility. The tools in this kit are designed to help strengthen communication and minimize frustration associated with ongoing caregiver-to-resident and resident-to-resident interaction -- from dining and occupational therapy to card-playing and assessment interviews.

MDS 3.0 BASIC COMMUNICATION KIT

This kit features the Pocketalker® personal amplifier, which provides superior amplification of sounds closest to the listener while reducing background noise. This communication tool is lightweight, portable and easy to use. And it can be used with or without hearing aids. Ideal for one-on-one conversations during assessment interviews with vulnerable elders. Also useful for small-group activities or communication while dining.

ADA and MDS 3.0 compliant.

KIT INCLUDES

- (1) Pocketalker personal amplifier
- (1) Single mini earbud
- (1) Deluxe folding headphone
- (1) Convenient, leatherette carry case
- (100) Sanitary headphone covers

OPTIONAL PRODUCTS FOR CMS MDS 3.0 COMPLIANCE

PHONEMAX AMPLIFIED TELEPHONE (TEL 030)

Improves speech clarity and amplifies calls without feedback. Features an extra loud ringer and/or flashing ring indicator, and easy-to-use buttons and volume control. Features 25dB amplification
